- CSS3
- JavaScript
- Tailwind CSS
- React.JS
- Python
- FastAPI
- Django
- Django Rest Framework
- Go
- Gin
- Java
- Spring Framework
- MySQL
- PostgreSQL
- Google Cloud
- Git and Github

LANGUAGES

Spanish (Native)
English (B2 Intermediate)

EXPERIENCE AND PROJECTS

2024

MAKERS FELLOWSHIP
SOFTWARE DEVELOPER

I worked as a Software Developer designing products and scripts for the internal use of the organization. I implemented automations in Airtable to improve the efficiency of the team. In addition, I participated in recruitment interviews and was president of the Code Ambassadors, promoting the expansion of Makers in Latin America.

2024

COLOMBIA TECH WEEK
BACKEND DEVELOPER

I worked as a backend developer, leading in this area the development of a matchmaking platform (with more than 1k users) that connected top investment funds with registered startups. The platform enabled mutual selection, and we added an LMS with two capital-raising courses for startups.

2024

FUNDRAISING SCHOOL
BACKEND AND AUTOMATION DEVELOPER

I was in charge of implementing automations using Zapier in conjunction with Airtable to provide users with all the necessary information as soon as they registered in the program. In addition, I performed dynamic web scraping to obtain funding information and facilitate their contact for partnership opportunities.

2024

SPOTINET
FRONTEND AND BACKEND DEVELOPER

Spotinet is a platform that allows users and vendors to obtain login codes for their accounts quickly and efficiently. By reducing reliance on human assistance, it improves service efficiency and offers a more autonomous experience.

2023

SOCKET CONNECTION
PYTHON DEVELOPER

This project focuses on developing an efficient word search system in a text (.txt) file using socket-based connection. The core concept is to enable different devices or programs to connect and collaboratively perform word searches in a shared file.
